

## DATA SHEET

# FortiExtender™

Available in:

Appliance

## Extend, Ensure, and Secure Your Network

FortiExtender offers scalable, cost-effective, and resilient 5G, LTE, and Ethernet solutions. Driven by Fortinet's unique approach of Security-driven networking FortiExtender allows organizations business continuity, improved network availability while securing connectivity with wired broadband and cellular networks.

From secure point of sale (POS) systems to vehicle fleet communication, FortiExtender provides reliable broadband access to the internet and extends the value of the Fortinet Security Fabric to support fluid business operations dependent on remote device connectivity.

### Security Fabric Integration

Integration with Fortinet SD-WAN and FortiGate appliances secures internet edge breakouts with a complete set of Web, Content, and Device security controls far beyond other industry solutions.

### Optimal Signal Strength

A single PoE cable provides optimal 5G/LTE signal vs complex, lossy antenna cables or limited strength USB modems. Dual SIM and Dual Modem options offer up to 5X network reliability.

### Simplified Management

Manage your FortiExtender from the FortiManager, FortiGate, or FortiExtender Cloud dashboard, making network changes, security controls, and policy automation simple.

## Highlights

- Improves use experience though optimal 5G and LTE wireless signal
- Provides secure network failover with out of band management (OBM), dual SIM, and dual Modem capabilities
- Integrates with Fortinet Secure SD-WAN for ease of deployment, management, and security
- Offers dynamic, flexible edge connectivity—switch links among ISPs based on data consumption, schedules, or ad hoc
- Enables network access for remote sites and branches located beyond fixed broadband
- Accelerates cloud connectivity for any user with flexible on-ramp paths to SaaS/IaaS
- Reduces overall WAN TCO with FortiGate Network Security Platform integration
- Cloud-based management empowers businesses with globally distributed locations
- Four LAN ports and routing capabilities enable remote connectivity and networking

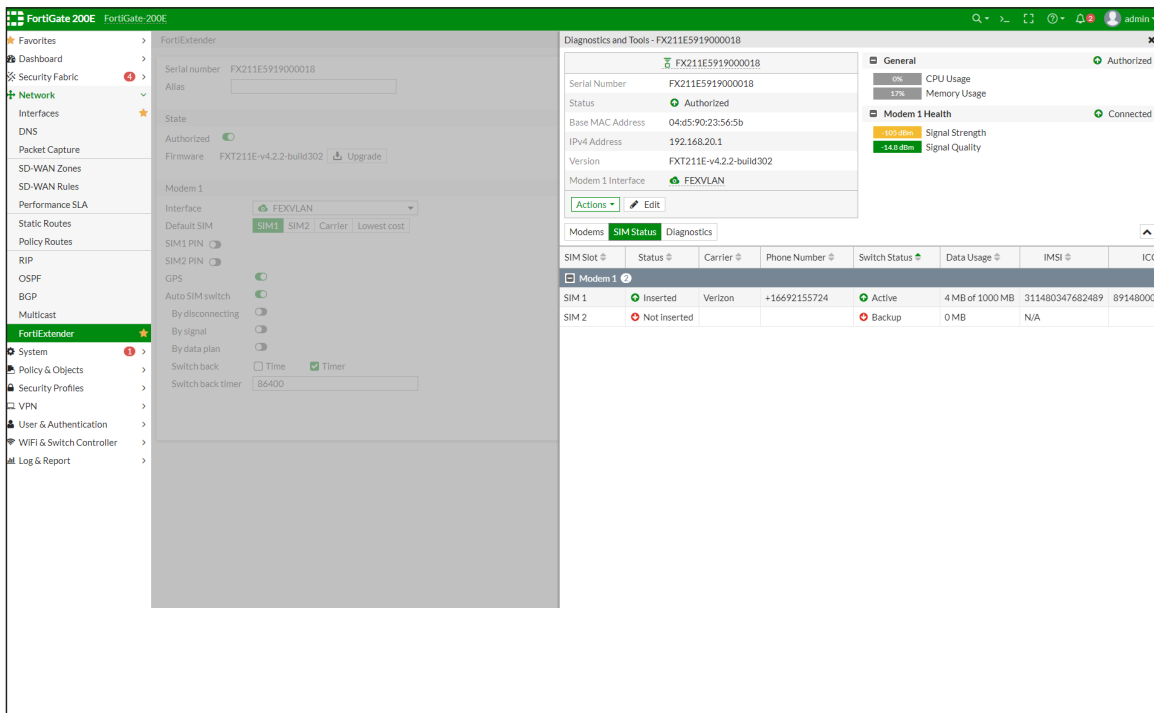

# FEATURES

## Superior Management, Security, and Control

FortiExtenders are a true plug-and-play device. Once connected to the FortiGate, they appear as a regular network interface in FortiOS management. IT administrators can manage the connection as well as implement complete UTM security and control, just like any other FortiGate interface. In addition, FortiOS will display data quota usage on the wireless WAN interface, providing complete visibility of the connection to ensure costly carrier data limits are not exceeded. The superior management, security, and control of the FortiExtender ultimately reduces IT costs while extending, ensuring, and securing the network.

## Flexible Deployment for Optimal Signal Strength

FortiExtender devices are designed to receive the best possible 5G/LTE signal. The device utilizes Power over Ethernet (PoE) so you can run a high-quality ethernet cable to a location with optimal signal strength, up to 100m away from the FortiGate or Network Switch.

FortiExtender managed with FortiGate

FortiExtender can be placed near a window for optimal signal strength.

## FEATURES

### Flexible 5G/LTE Connectivity

The FortiExtender family of 5G/LTE appliances support dual SIM and dual modem options, enabling up to four different ISPs for 5G/LTE connectivity. Our dual SIM models allow for one active and one passive cellular link, providing fast failover. Dual Modem options provide two active and two passive links, for the fastest failover and disaster recovery. You can also configure the FortiExtender to utilize an ISP link until a certain data usage threshold is reached. At that point, FortiExtender can automatically shift over to another ISP and use that 5G/ LTE connection. Additional conditions can be set to shift the connection between SIM cards, allowing you to balance connectivity and cost.

Mix LTE and Cable/DSL connections for load-balancing and/or failover

### Hybrid WAN-LAN Connectivity

FortiExtender offers four LAN Ethernet ports to enable multiple connections to the LTE connection. Ideal for High Availability (HA) pairs of FortiGates, each FortiGate can be directly connected to the FortiExtender. Either FortiGate can run in load-balancing or failover modes and receive WAN connectivity from the FortiExtender.

Switch between ISPs based on cost or data usage

### Flexible WAN Connectivity

FortiExtender offers new WAN connectivity options with an Ethernet WAN port, in addition to the LTE WAN links. With this WAN port, you can connect to a DSL, cable, or another modem for additional WAN connectivity options. Load-balancing and failover options enable your FortiExtender to manage your WAN connections across several options to ensure connectivity at the best cost point.

Easily supports two FortiGates in HA mode without additional hardware

# HARDWARE SPECIFICATIONS

	FEX-101F-AM	FEX-101F-EA
<b>Hardware and System</b>		
Modem Support	Internal (1x Modem)	Internal (1x Modem)

## Certification notes:

The built-in modem offers quad-band connectivity to HSPA+ networks worldwide and expected to work in 3G mode worldwide, subject to carrier support.

There are exceptions however, as some carriers control the access to their network to specific carrier certified devices. These carriers allow only certified modem IMEI numbers on their network and have the ability to disable the LTE connection after a period of time.

The following carriers are known to require additional testing to obtain certification. Please reach out to the Fortinet sales team and to evaluate your specific regional requirements: Brazil (VIVO), USA (Sprint), New Zealand, Arabian Peninsula (all carriers), UK (All carriers).

## ORDER INFORMATION

PRODUCT	SKU	DESCRIPTION
<b>3G/4G/LTE/5G Models</b>		
<b>FortiExtender 101F</b>	FEX-101F-AM	Indoor Broadband Wireless WAN Router with 1x "Dual SIM 3G/4G LTE CAT6 M.2 Module (DL/UL=300M/50Mbps)" for North America Carriers. 5x GE WAN/LAN configurable RJ45 ports including 1x 802.3af/at POE PD port and GPS/GNSS service.
	FEX-101F-EA	Indoor Broadband Wireless WAN Router with 1x "Dual SIM 3G/4G LTE CAT6 M.2 Module (DL/UL=300M/50Mbps)" for EMEA, some APAC, Brazil Carriers. 5x GE WAN/LAN configurable RJ45 ports including 1x 802.3af/at POE PD port and GPS/GNSS service.
<b>FortiExtender 201E</b>	FEX-201E	Indoor Broadband Wireless WAN Extender with 1x Dual SIM 3G/4G/LTE CAT6 modem for North/South America and Europe Carriers, and some APAC Carriers. 5x GE WAN/LAN configurable RJ45 ports including 1x 802.3af/at POE PD port and GPS port.
<b>FortiExtender 211E</b>	FEX-211E	Indoor Broadband Wireless WAN Extender with 1 x Dual SIM 3G/4G/LTE CAT12 global modem, 5 x GE WAN/LAN configurable RJ45 ports including 1x 802.3af/at POE PD port and GPS port.
<b>FortiExtender 212F</b>	FEX-212F	Indoor Broadband Wireless WAN Extender with 2x Dual SIM 3G/4G/LTE CAT12 global modem, 5 x GE WAN/LAN configurable RJ45 ports including 1x 802.3at POE PD port and GPS port.
<b>FortiExtender 511F</b>	FEX-511F	Indoor Broadband Wireless WAN Router with 1x "Dual SIM 5G Sub-6GHz" radio for Global Carriers, with Cat20 LTE support. 5x GE WAN/LAN configurable RJ45 ports including 1x 802.3at POE PD port (25.5W) and 1x SFP port.
<b>Ethernet Models</b>		
<b>FortiExtender 200F</b>	FEX-200F	FEX-200F is an extension of the FortiGate LAN interface, connecting to FortiGate with a secured L2 tunnel for Layer2~Layer7 security for branch offices. 5x GbE RJ45 ports, each can be configured as WAN or LAN by software.
<b>FortiCare</b>		
<b>FortiCare Support</b>	FC-10-X101M-247-02-DD	24x7 FortiCare Contract for FEX-101F-AM.
	FC-10-X101A-247-02-DD	24x7 FortiCare Contract for FEX-101F-EA.
	FC-10-F201E-247-02-DD	24x7 FortiCare Contract for FEX-201E.
	FC-10-F211E-247-02-DD	24x7 FortiCare Contract for FEX-211E.
	FC-10-X212F-247-02-DD	24x7 FortiCare Contract for FEX-212F.
	FC-10-X511F-247-02-DD	24x7 FortiCare Contract for FEX-511F.
	FC-10-F200F-247-02-DD	24x7 FortiCare Contract for FEX-200F.
<b>Accessories</b>		
<b>Power Adapter</b>	SP-FAP400-PA	AC power adapter for use with FEX-201E, FEX-211E, FEX-212F and FEX-511F, FEX-101F and FEX-101F models

Fortinet®, FortiGate®, FortiCare® and FortiGuard®, and certain other marks are registered trademarks of Fortinet, Inc., and other Fortinet names herein may also be registered and/or common law trademarks of Fortinet. All other product or company names may be trademarks of their respective owners. Performance and other metrics contained herein were attained in internal lab tests under ideal conditions, and actual performance and other results may vary. Network variables, different network environments and other conditions may affect performance results. Nothing herein represents any binding commitment by Fortinet, and Fortinet disclaims all warranties, whether express or implied, except to the extent Fortinet enters a binding written contract, signed by Fortinet's General Counsel, with a purchaser that expressly warrants that the identified product will perform according to certain expressly-identified performance metrics and, in such event, only the specific performance metrics expressly identified in such binding written contract shall be binding on Fortinet. For absolute clarity, any such warranty will be limited to performance in the same ideal conditions as in Fortinet's internal lab tests. Fortinet disclaims in full all covenants, representations, and guarantees pursuant hereto, whether express or implied. Fortinet reserves the right to change, modify, transfer, or otherwise revise this publication without notice, and the most current version of the publication shall be applicable.

Fortinet is committed to driving progress and sustainability for all through cybersecurity, with respect for human rights and ethical business practices, making possible a digital world you can always trust. You represent and warrant to Fortinet that you will not use Fortinet's products and services to engage in, or support in any way, violations or abuses of human rights, including those involving censorship, surveillance, detention, or excessive use of force. Users of Fortinet products are required to comply with Fortinet's EULA (<https://www.fortinet.com/content/dam/fortinet/assets/legal/EULA.pdf>) and to report any suspected violation of the EULA via Fortinet's online reporting tool operated by independent third-party EthicsPoint (<http://www.ethicspoint.com>) or directly to Fortinet's legal team at [legal@fortinet.com](mailto:legal@fortinet.com)
